ECSPSP
Quick Start Guide

Fort Smart Plug with Mains Passthrough
and Switchable USB & USB-C

The latest product manuals and software is available online:
https://www.espuk.com/technical_support

REV: J22

Product Description

The WiFi Smart plug (ECSPSP) forms part of the ESP Fort range of smart products, and can also be used in conjunction with Scolmores ClickSmart+ range of products.

Users are able to control the smart plug using the ClickSmart+ app, manually (once configured accordingly) and using voice controls (once correctly configured).

The ECSPSP can work in conjunction with other devices to implement smart scenarios. For example, in conjunction with the Fort Smart Security Hub (ECSPHB), if the Hub has been disarmed, this can switch either of the outputs on the Smart Plug.

Preparation for use

To use the ECSPSP you will need to download the ClickSmart+ app.
Ensure that you have a mobile device running iOS 8 or higher, or Android 4.1x or higher, and a sufficient WiFi network connection.

It is important to know your Wi-Fi network and W-Fi network's password before pairing the socket to the ClickSmart+ app.

Download the **ClickSmart+** App on your mobile device from the App Store or Google Play.
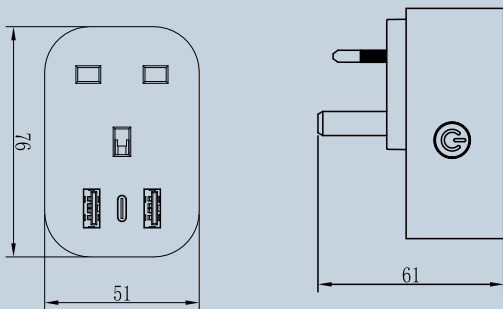

You can scan the above QR code to directly download the app

Sign in or register following the instructions on the **ClickSmart+** App.

Product Information

|	Operating Voltage	220-240V
	WiFi Frequency	2.4GHz
	Max. Load (Watts)	3120W
Product Specification	Max Load (Amperes)	13A
	Network Protocol	Wi-Fi (IEEE 802.11a/b/g)
	Operating Temperature	-20 to 40°C
	Product Dimensions	51x76x61 mm
	IP Rating	IP20
	Certification	CE & UKCA

CE   UK
      CA

Installation Instructions

1. On the ClickSmart+ app's home page, click on the "+" symbol in the top right of the home screen.
2. Then click on "ESP" on the left handside.
3. And finally click on "Plug In WiFi Smart Socket with USB"
4. The app will then display on screen instructions for pairing the ECSPSP onto the Wi-Fi network.

Resetting the ECSPSP

To reset the ECSPSP you need to do the following;
1. Press and hold the ON/OFF switch on the side of the ECSPSP, until the LED indicator begins to flash
2. The ECSPSP is now reset.

*If the Smart Plug needs to be bound with a new master account, remove the device from the app, prior to resetting the device.
