<p>Wireless socket adaptor pairing method*:</p> <p>The wireless Quinetic energy switch and wireless socket adaptor can be paired with any combination: an adaptor can be controlled by a maximum of 10 separate switches, a switch can pair with an unlimited number of socket adaptors. The range of a switch may also be extended by putting the adaptor into the " Bridging Mode".</p> <p>Code pairing steps:</p> <ol style="list-style-type: none"> 1. Press the function button for 3 seconds and the indicator light begins to flash slowly. Then release the button and enter the single pairing state. 2. Press the wireless kinetic energy switch and the indicator light of the socket adaptor will go out, which means that the pairing is successful. 3. If you need to add more switches to the same adaptor, please repeat the above process: each adaptor can store up to 10 switches, pairing in formation. 4. Single, double and triple switches follow the same pairing method. 5. In order to put the controller in to Bridging mode press the function button for 7 seconds. The indicator light will pulse continuously to indicated a successful "bridge". 6. If the controller indicator light continues to pulse the controller will still function normally even if used with a single switch. 7. To remove the adaptor stored pairing information press function button for 10 seconds until the indicator light goes out - the pairing information will be removed.  <p>Press for 3 seconds to enter program mode</p>  <p>Press for 10 seconds to clear memory</p>	<p>Precautions:</p> <ol style="list-style-type: none"> 1. To prevent injury, the socket adaptor must be securely plugged in to a 13 Amp wall socket. 2. Please note the maximum loading of an individual controller. Exceeding this maximum will result in blowing the fuse (non replaceable). 3. Do not short-circuit, otherwise it will cause permanent damage to the socket adaptor. 3. The socket will remain "OFF" after a power cut, saving energy, reducing fire risk and protecting your appliances. 4. For indoor use only. 5. Please use the socket in dry place; it must not be used in a bathroom or other damp locations. 6. Damage caused by incorrect installation and operation are not covered under warranty. <p>Troubleshooting:</p> <ol style="list-style-type: none"> 1. If pairing does not work first check if the indicator is lit. Re-pair in case the pair is lost after power failure. 2. If the receiver does not respond check the LED indicator. If this does not light check the wall outlet and refer back to supplier. 	<p>Quinetic Wireless Socket Adaptor Dimensions:</p>  <p>*Please note: For more pairing information visit www.ftc-direct.co.uk</p>
