Adding an override switch to a Quinetic PIR using a QUR323 Dual controller

Instructions:

1. Pair the Quinetic PIR to Channel 1 of the QUR323 Dual controller.
2. Pair a Quinetic switch to Channel 2 of the QUR323 Dual controller.
3. Link both Channel 1 and Channel 2 outputs together as per the wiring diagram below.
4. The Quinetic switch will act now as a manual override switch, turning the light ON permanently.
5. When the switch is turned OFF the PIR will function normally.
