TKE/P32+

Tail Kit Solutions from WISKA

What's New?

The TKE/P32+ sees the addition of our new ESKV 32+ cable gland. The ESKV 32+ has a much wider clamping range (19-25mm).

What does this mean for users?

It means you no longer need to use an M40 cable gland with a reducer (TKE/P40/RD) when wiring in an 18th Edition compliant consumer unit. The TKE/P32+ will allow 2 x 25mm tails and 1 x 16mm earth to be installed into an M32 gland. This gives a much sleeker finish as well as cost savings on material use.

**18th Edition
Compliant**

High protection

IP68, glow wire test 750 °C.

Wider Clamping Range

The TKE/P32+ comes complete with our latest cable gland: The ESKV M32+ offering a wide clamping range (19-25mm)

WIDE

Inserts

The TKE/P32+ comes complete with an MFD (Multiple Insert Options), suitable for 2 x 25mm tails and 1 x 16mm earth.

No Gasket

Thanks to its unique design, our glands require no thread gasket (it's built in already!)

M32+

The TKE/P32+ is suitable for M32 entries.

Vibration Proof

Due to our unique thread pitch design.

Clamping Cage

With its patented clamping cage, our glands offer superior strain relief.

100% Polyamide

100% polyamide, UV resistant and halogen free.
